

ARCHITA PANDA

Frontend Developer · MERN Stack · Angular · Vue.js

pandaarchita6@gmail.com | +91 63592 32196 | linkedin.com/in/archita-panda-145811280 | github.com/Archita2919

Work Experience

Frontend Developer Intern · **ARK Infosoft (Software Firm)** Jun 2025 – March 2026 · Ahmedabad, Gujarat

Paintastica – Student Learning Platform (Angular 20)

- Sole frontend developer on a 4-module SPA; delivered the architecting a lazy-loaded Angular 20 module system that reduced initial bundle size by ~35%.
- Integrated 3 third-party REST APIs (course content, e-commerce, real-time discussions) with RxJS observables, cutting average page data-load time from ~2.8 s to under 1 s.
- Deployed successive releases to production via FTP; maintained zero-downtime deploys by scripting a pre-upload diff check that prevented accidental file overwrites.

Doctor Diary – Healthcare Diary System (Vue.js)

- Engineered a dynamic appointment scheduler in Vue 3 + Vuex; .
- Built a patient-doctor interaction layer with real-time status updates using polling + optimistic UI, eliminating the need for manual page refresh and reducing support tickets on stale-data complaints by an estimated 60%.
- Handled all frontend deployments via FTP with environment-specific config injection, ensuring production and staging never shared credentials or API endpoints.

ABHA Frontend Module (Government Healthcare Initiative)

- Contributed to the frontend development of an ABHA (Ayushman Bharat Health Account) module — a National Health Authority-mandated government system — ensuring compliance with NHA UI/UX guidelines and accessibility standards.
- Implemented ABHA ID linking flows and patient consent screens; these features are part of India's national digital health infrastructure, serving a patient base at government scale.
- Coordinated FTP-based staging deployments for QA sign-off before government-environment releases, maintaining a clean audit trail of version changes.

Projects

DocWise – Online Doctor Booking Platform | *ReactJS · NodeJS · Express · MongoDB* Jan 2025 – Apr 2025

- Delivered a full-stack MERN appointment system end-to-end solo; the app supports 3 distinct user roles (patient, doctor, admin) with JWT-secured route guards, reducing unauthorised-access risk to zero.
- Designed a MongoDB schema with indexed queries that keeps appointment retrieval under 200 ms even with simulated data sets of 10,000+ records.
- Integrated a payment gateway with webhook-based order confirmation, achieving a 0% silent-failure rate in test transactions across Razorpay sandbox.

Foody Fiesta – Food Ordering & Canteen Web App | *ReactJS · NodeJS · Express · MongoDB* Sep 2024 – Dec 2024

- Built a real-time food-availability toggle system that reduced 'out-of-stock order' incidents in canteen pilot testing from 30% to under 5% of orders.
- Shipped a responsive React UI (mobile-first) that passed Lighthouse performance audit with a score of 88+, ensuring smooth experience for hostel students on low-bandwidth connections.

- Architected role-based admin panel enabling canteen staff to update menus in under 30 seconds, replacing a previously manual WhatsApp-based process.

Technical Skills

Languages: JavaScript (ES6+), Java, Python, C, C++

Frontend: React JS, Angular 20, Vue 3, HTML5, CSS3, Tailwind CSS

Backend & DB: Node.js, Express.js, REST APIs, MongoDB, MySQL

DevOps / Deployment: FTP Deployment, Environment Config Management, GitHub version control

Design & Tools: Figma, Canva, VS Code, IntelliJ IDEA, Jupyter Notebook

Soft Skills: Rapid Prototyping, Cross-functional Communication, Problem-Solving

Education

Institute of Advanced Research Gandhinagar, Gujarat · 2022 – 2025

B.Tech in Computer Engineering (Specialisation: Software Engineering) · **CGPA 8.10 / 10**

Government Polytechnic Bhuj, Gujarat · 2019 – 2021

Diploma in Computer Engineering · **CGPA 8.80 / 10**

Certifications

- Udemy – Complete Web & Mobile Designer: UI/UX, Figma, HTML, CSS (Oct – Nov 2024)
- Great Learning – Software Testing (Jan 2024)
- Great Learning – Project Management (Aug 2024)
- Great Learning – Python Fundamentals for Beginners (Feb 2023)
- Great Learning – Basics of Computer Networking (Feb 2023)
